

BREAKING THE BIAS

Ada Lovelace Mathematician

Ada Lovelace is often regarded as the first computer programmer. She worked with Charles Babbage as he developed

his Analytical Engine and was the first to recognise its application beyond pure calculation - in effect, devising the first algorithm.

Ada Lovelace Day, held on 12 October every year, is an annual international celebration of women's achievements in science, technology, engineering, and maths. Its goal is to increase the profile of women in these fields and so create new role models for women and girls.

*Celebrating International Women's Day
8th March*
