

## **Women's Empowerment Principles, UN Women**

The **Women's Empowerment Principles** offer guidance to businesses, and organisations like ours, on how to promote gender equality and women's empowerment in the workplace. The WEPs have been established by **UN Global Compact and UN Women**. Statistics prove that businesses that support and nurture their women employees are more secure and profitable.

**This has to be the way forward to secure equality once the pandemic is over.**

### **Conference Day by BPW UK**
