**Mission Statement:** To support the most disadvantaged people in Ukraine and Belarus, without any political affiliation, to provide support that is fair, unbiased and without discrimination. We believe that everyone is entitled to a minimum standard of living and healthcare, but the people we care for lack the means to achieve these standards. Helping those who may otherwise slip through the larger net of the Corporate Charities and Aid Providers – help, where others sometimes are not able to deliver. We will always prioritise the needs of children, but where necessary will also include the needs of other family members and apply the same criteria to institutions such as schools, colleges, and orphanages. We seek to deliver speedy, agile, and targeted support with our network of expert partners, on the ground and remotely.
Leveraging our expert resources to build both emergency and sustainable solutions together with Aid Providers, Corporate Partners, and Government Institutions. Providing respite relief for children and families. Our motto has always been 'Offering Hope, to Live'.

**Ukraine Crisis** We work primarily in the northern regions of Ukraine that are being badly affected by the current conflict and have no political affiliation. We are known & trusted by the local communities and our only interest is to help the children and their families by being there for them in their time of need.Please go to our Facebook page for updates.
